

# Advanced Recon Commandos

## Overview

ARC Troopers are the Republic's elite among standard clones. With superior skill and leadership, they undergo advanced training to complete the most difficult missions that regular clones cannot. They serve with the Republic's elite leaders and front-line spearheads. Led by CC-2240 "Thragg", they set the standards.

## Organizational Structure

Currently, the ARCs are organized into two classes: **Null-Class** and **Alpha-Class**.

## Null-Class

- **Role:** The Null-class Advanced Recon Commandos stand at the absolute pinnacle of clone development. Numbering only six, they are beyond the scope of any clone within the Grand Army of the Republic in terms of intelligence, speed, strength, and mass.
- **Weaponry:** Null-class utilizes standard issue weaponry alongside the Westar M5 and the Dual DC-17b pistols.
- **Leadership:** The first Class Captain is **N-11 "Ordo"**, overseeing the strategic and tactical operations of Null-class.

## Alpha-Class

- **Role:** The Alpha-class Advanced Recon Commandos were the first 100 successful clones engineered by the Kaminoans to be stronger, faster, and smarter than standard clones.
- **Weaponry:** Alpha-class is equipped with standard issue weapons, alongside the Westar M5 and Dual DC-17b pistols.
- **Leadership:** The first Class Captain is A-17 "**Alpha**", guiding Alpha-class in their fast-paced operations.

The A.R.C Troopers continue to excel on the battlefield.
