

Seban Kenetos

Found in a rural village on Carida, Seban was discovered to be Force Sensitive at a young age. Found by a Jedi Master, he was taken to Coruscant to begin his studies. After a few years on Coruscant he was moved to Tython where he remained throughout his teenage years. Seban had a great love for space travel and exploration and would often enjoy utilising the flight simulators and practice his manuevers.

Seban Kenetos is often described as a recluse, he tended to keep to himself and focus on his studies and bettering himself. When he was a Padawan he lost many of his friends due to the on-going war, this made him stop losing faith in making new friends and connections as he was tired of losing the many other Jedi he befriended. In his later career as a Jedi Ace, he was assigned to the 442nd as the Jedi General by Grandmaster Obi Wan.
