

Geonosis

Overview

Located 43000 light years from the Galactic Core, Geonosis sits as one of the major CIS droid factory planets in the Outer Rim, with a population of nearly 100 billion, with 99% of that number being the resident Geonosians. The planet is a harsh, rocky desert, with a breathable atmosphere. The sky is filled with its 2 suns. Orbiting the planet are 15 moons, and an asteroid belt. Underneath the great spires and arid climate, lay a massive tunnel system stretching for thousands of miles.

Society and Culture

Geonosians, though controlled by a monarchy, are all connected through an ancient hive mind. Each Geonosian is connected to one another through the queen. They can apparently speak telepathically through one another.

Government

Led by the CIS backed leader Poggle the Lesser, the billions of Geonosians serve under him as a sort of spawn.

Rumors are told of a hive queen who is the heart of all hive mind on the planet.
