

The Land of Irons Arc

Background

A Nation to the North, A Group of so called "Samurai" known as the Shinshengumi. Deep within the vast expanse of the land, shrouded by an air of authority, two seasoned Jonin were of great importance. Their objective: to secure the remnants of a long-lost book. Little did they know that this seemingly innocuous mission would reshape the destiny of the entire land.

The discovery of the book led to the execution of a plan that caused discontent among the Shinobi who had hoped to see a new era of peace flared, and the shadows of doubt crept through the land.

Blades of Betrayal

Simultaneously, a squad under the leadership of the Kazekage embarked on an investigation into a mysterious village steeped in folklore. As the distraction unfolded, Takeshi Kurogane seized the opportunity to unleash chaos. Striking with deadly precision, he claimed the life of Kira Hozuki, leaving the Shogun wounded and defenseless. Takeshi escaped with two prized possessions—an azure Blue blade and a gleaming Gold blade—his actions setting the stage for a tumultuous period in the Land of Iron.

Amidst the turmoil, the Shogun's wife brought forth two children, each bearing a distinct complexion—one dark-skinned, the other pale. Unbeknownst to many, the clandestine Kenrai Elite, operating in the shadows, prepared to unleash a mysterious seal that would send ripples through the fabric of reality.

Clash of Titans

A wave of shinobi, commanded by the enigmatic [Valentine Kurogane](#), descended upon the land under the united banner of all Kage. In an unprecedented alliance, the leaders of the shinobi world clashed with the Kenrai Elite, resulting in a devastating battle that claimed the lives of 200 samurai. The Kenrai Elite fought relentlessly, running for weeks without respite, until the surviving forces closed in on them. In a moment of desperation, the Last Kenrai Elite sacrificed their life to release a seal. Kiyoshi Kurogane expended his last chakra, tearing open a rift into the depths of hell.

LOCATION	Land of Iron
PARTICIPANTS	Kurogane , Sungakure , Kirigakure , Iwagakure , Konohagakure
DEATHS	300 Shinobi & 200 Samurai
OUTCOME	Unknown

Aftermath and Ascension

Figures approached from the Land of Iron, the surviving Shinobi, a mere fraction of their original number. Of the 45 who ventured forth, only 17 returned, their faces etched with the scars of a harrowing journey. The Hidden Mist Shinobi fared even worse, with only one lone survivor.

Though granted the esteemed title of Jonin, the question lingered—had they truly accomplished their mission? The shadows of doubt loomed large, but the resilience of these 17 warriors showcased their true worth. The Land of Iron, now free from the clutches of the Kenrai, bore witness to a bitter truth. Despite claims of slaying members of the Elite Squad, no evidence surfaced. The fallen Shinobi and Shinsengumi Samurai lay lifeless, yet the Elite Kenrai bodies remained elusive. The aftermath left a lingering sense of unease, a subtle whisper of deception in the wind.

A New Era

In the end, Valentine Kurogane, the General of the Shinsengumi, ascended to the position of Shogun. The Land of Iron, scarred by the recent turmoil, closed its borders to the outside world. A new era had dawned, marked by uncertainty, political intrigue, and the echoes of a past that refused to be forgotten.

Takeshi Kurogane, apart of the group called the "Kenrai" and was second in command. He was killed by Kagetsu "The Lord of Yin"
